Tools for Knowledge Workers

A Tool for Creating Tools

smartdraw

With the addition of **smart**draw the number of tools in The Knowledge Workers' Tool Room reaches 50. All are visual in nature and all but a few have been created using **smart**draw. It is the case, then, that **smart**draw is also a tool for knowledge workers.

I have been using **smart**draw for several years now and I find it easy to use, rich in features and very flexible, meaning I can bend and twist it to suit my purposes and create the visual tool I have in mind. **smart**draw is indeed a tool for creating tools.

To give you an idea of the range of visuals I've been able to create, here are a couple of links to visual presentations that illustrate what I've been able to do with **smart**draw. They both contain numerous samples and examples. Both links lead to PowerPoint presentations that are in .pdf format.
